Kyocera Display Group enhances product portfolio

New 8.4” Super Wide Viewing Angle SVGA LCD with integrated LED driver circuit

Kyoto / Neuss, 18 October 2011 – The Japanese technology corporation Kyocera, a leading manufacturer in the field of electronic devices, is extending its product range by adding a new 8.4-inch Super Wide Viewing Angle SVGA LCD module.

Utilizing the latest display technology, Kyocera’s new 8.4-inch LCD features SVGA resolution, an integrated LED driver circuit, long-life LED backlighting with low power consumption, up to 70,000 hours of operating time, and a viewing angle of 170 degrees, which covers the needs of medical- and industrial-use applications.

For simple usage and installation, this module comes equipped with an integrated LED driver circuit, so that no external components are required to drive the backlighting. Also, the specially-designed LED backlighting provides lower power consumption by using the latest technology for LED chips and light guides. In addition, the LVDS interface guarantees easy and simple operability.

Combined with these features is the ability to provide consistent delivery and particularly long product availability, which distinguishes Kyocera as a reliable supplier.

The Kyocera Group is actively engaged in the development of environmentally friendly products and continually strives to reduce the use of environmentally degrading materials and processes in its manufacturing. The company complies with the EU’s RoHS (Restriction of Hazardous Substances) directive.

Press information

Model	TCG084SVLQ*PNN-AN*02
Resolution	800 x R,G,B x 600
Dimensions	199.5 x 147.4 x 9 mm
Screen Area	170.4 x 127.8 mm
Operating Temperature Range	-20 to + 70 °C

About Kyocera

Headquartered in Kyoto, Japan, Kyocera Corporation is one of the world's leading manufacturers of fine ceramic components for the technology industry. The strategically important divisions in the Kyocera Group, which is comprised of 208 subsidiaries (as of March 31, 2011), are information and communications technologies, products which increase quality of life, and environmentally friendly products. The technology group is also one of the largest producers of solar energy systems worldwide.

With a global workforce of about 66,000 employees, Kyocera posted net sales of approximately €10.74 billion in fiscal year 2010/2011. The products marketed by the company in Europe include laser printers, digital copying systems, microelectronic components, finceramic products and complete solar power systems. The Kyocera Group has two independent companies in the Federal Republic of Germany: Kyocera Finceramics GmbH in Neuss and Esslingen and Kyocera Mita Deutschland GmbH in Meerbusch.

The company also takes an active interest in cultural affairs. The Kyoto Prize, a prominent international award, is presented each year by the Inamori Foundation — established by Kyocera founder Dr. Kazuo Inamori — to individuals and groups worldwide who have contributed significantly to the scientific, cultural, and spiritual betterment of humankind (converted at present €430,000 per prize category).
